

TESIM

Technical support to the implementation
and management of ENI CBC programmes

ENI CBC on-line event on monitoring and evaluation

- *Practical aspects of the result-oriented monitoring of projects*

31 March and 7 April 2020

A project funded by the European Union

Implemented by a consortium led by

Introduction

The implementation of the ENI CBC programmes is now in full swing. Most of the calls for proposals have been closed, project assessment done, and the contracts with the lead beneficiaries signed. The start of the project implementation also implies a shift in the programme activities related to monitoring and evaluation, moving from planning and procedure development to actual monitoring of project implementation, including their daily follow-up, the performance of result-oriented monitoring as well as checks of the interim (and in some cases even final) project reports.

The topic for discussion during the **monitoring and evaluation network meeting** is related to the practical aspects of result-oriented monitoring that has to be carried out by the Managing Authorities on top of the day-to-day monitoring of projects. The meeting will count on the participation of ROM practitioners who will be available for practical discussions concerning the ROM missions to projects organised by the Managing Authorities.

Agenda

9:00 - 9:15	<i>Introduction, technicalities, scope of the event</i>
9:15 – 9:30	<i>Introduction to result-oriented monitoring (TESIM presentation)</i> Where do ENI CBC programmes stand with the result-oriented monitoring of their projects? Which are their plans related to ROM? <i>(General information on ROM by TESIM and outcome of the survey with programmes)</i>
9:30 – 10:45	<i>Main challenges in carrying out result-oriented monitoring (TESIM presentation)</i> <ul style="list-style-type: none"> • Understanding the project • Efficient desk research: structured approach to processing large amount of information • Capturing the essential with result-oriented monitoring tools • The “results” perspective • Synthesizing the collected information based on the questions in the checklist
10:45 – 11:15	<i>Questions and answers session</i> <i>(Questions can be put forward by the participants in the forum chat during the entire presentation. TESIM will screen and select those which can be given an immediate answer)</i>
11:15 – 11:30	<i>Wrap up and next steps</i> <i>(We suggest that right after the webinar you plan some time for your individual reflections and sending in questions which will be later on answered in a consolidated Q&A paper. The means and timeline of the exercise will be explained by TESIM)</i>
