

DECONCRETE

Giving a second life to concrete after demolition

PROJECT TITLE	DeConcrete - Eco-Efficient Arctic Technologies Cooperation
IMPLEMENTATION PERIOD	15.10.2019 - 30.09.2022
ORGANISATIONS INVOLVED	Northern (Arctic) Federal University (RU); UiT The Arctic University of Norway (NO); Northern Research Institute Narvik (NO); University of Oulu (FI)
PROGRAMME	Kolarctic CBC 2014-2020
TOTAL BUDGET	1.178.125,00 €

The project aims at enhancing cooperation between the industry, the academic sector and R&D communities to boost the growth of the circular economy in the Kolarctic region. In particular, the cross-border collaboration is developing new, sustainable approaches to the reuse and recycling of construction materials - especially concrete - in cold climate conditions.

ENERGY EFFICIENCY

Project co-funded by the European Union
