

Minimally invasive surgery to improve life quality of cancer patients

PROJECT TITLE Reduction of social exclusion and increase in the quality of life of cancer patients in Vilnius and Grodno regions

IMPLEMENTATION PERIOD 03.2019 - 02.2021

ORGANISATIONS INVOLVED Public institution Vilnius University Hospital Santaros Klinikos (LT), Healthcare institution "Grodno University Clinic" (BY)

PROGRAMME Latvia – Lithuania – Belarus
ENI CBC 2014-2020

TOTAL BUDGET 1.544.229,30 €

The project seeks to improve the life quality of cancer patients by increasing the access to minimally invasive surgery services. This leads to lower hospitalization duration, lower probability of postoperative complications and faster return to normal activities. This will entail capacity-building of specialists in the fields of urology, gynaecology and abdominal surgery, knowledge sharing during regular consultations, and the acquisition of innovative equipment for the provision of minimally invasive surgery services.
