

LOTTA

More connected thanks to safer road traffic conditions

PROJECT TITLE **LOTTA – General Furnishing and Surface Infrastructure Development of the Kola – Verhnetulomsky – BCP Lotta Road**

IMPLEMENTATION PERIOD 01.11.2018 – 31.10.2021

ORGANISATIONS INVOLVED State organization for managing the roads of the Murmansk region “Murmanskavtodor” (RU); Autonomous non-commercial organization “Project Management Centre” (RU); Lapland Development Centre for Economic, Transport and Environment (FI)

PROGRAMME Kolarctic
CBC 2014-2020

TOTAL BUDGET 4.500.000,00 €

The project aims to improve the connection between the neighbouring countries by creating comfortable and safe conditions for road traffic on both sides of the Russian-Finnish border. The project partners are implementing important improvements in road infrastructure, such as furnishing guarding rails, installing new information signs and refurbishing parking places. The project activities improve economic, tourist and cultural links between Russia and Finland and have a positive impact on the lives of the people living in the municipalities along the target route.

ACCESSIBLE BORDER REGIONS

Project co-funded by the European Union
