

CROBODDIT

Disruptive information technologies for urban waste management

PROJECT TITLE

CroBoDDIT – Cross-border dimensions of disruptive information technologies

IMPLEMENTATION PERIOD

01.04.2019 – 31.03.2022

ORGANISATIONS INVOLVED

LUT University (FI); ITMO University (RU); Forum Virium Helsinki Oy (FI); St. Petersburg State Unitary Enterprise “St. Petersburg Information and Analytical Centre” (RU)

PROGRAMME

South-East Finland – Russia
CBC 2014-2020

CBC 2014-2020
SOUTH-EAST FINLAND - RUSSIA

TOTAL BUDGET

750.552,00 €

Digitalisation of waste management in urban environments is a significant step in the development of a circular economy. The CroBoDDIT project promotes the development of disruptive information and communication technologies in urban infrastructures to improve waste management combining the experience of the Russian and Finnish partners. The project aims to minimize the costs of transportation and recycling by using the opportunities of the Internet of Things and the Ethereum platform used for the creation of decentralized online services based on blockchain technology.

Project co-funded by
the European Union

OPEN INNOVATION
