

# GREENWHEELS

*Electric cars, the future of transport is today*

<b>PROJECT TITLE</b>	<b>GreenWheels - Ecotransport of the Future, today</b>
<b>IMPLEMENTATION PERIOD</b>	01.08.2020 – 31.07.2022
<b>ORGANISATIONS INVOLVED</b>	Factory of Investment Projects (UA); First Contact Center – Michalovce (SK); KIÚT Regional Development Association (HU)
<b>PROGRAMME</b>	Hungary - Slovakia - Romania - Ukraine ENI CBC 2014-2020
<b>TOTAL BUDGET</b>	937.170,18 €

The GreenWheels project aims at encouraging the development of electric vehicles in the region. The partners are developing a network of public infrastructures for electric vehicles to enhance cross-border mobility and to raise awareness of the stakeholders and general public. The project is also providing recommendations to local and regional authorities to include electric vehicles needs in urban areas and inter-city roads. As a result, 17 charging stations are being installed by the project and 60 more free public stations are expected to be established thanks to the project's consultancy and support activities. As an innovation, a "0" emissions rapid charging station based on solar energy will be also installed and operated by the project.
