

HEALTH4ALL!

Reaching out to kids with special needs

PROJECT TITLE	Health4all! - Capacity building in the health care system providing for children with special needs
IMPLEMENTATION PERIOD	04.10.2019 - 03.10.2021
ORGANISATIONS INVOLVED	Hidden Treasures Down Syndrome Association (HU); Malteser Charity Organisation in Berehove (UK)
PROGRAMME	Hungary-Slovakia-Romania-Ukraine ENI CBC 2014-2020
TOTAL BUDGET	965.817,18 €

The project aims at providing support to children aged from 0 to 6 with congenital or acquired disabilities and their families. At the same time, the project is contributing to advance professionals' knowledge and to strengthen interdisciplinary cooperation. The spread of good practices and know-how between the Hungarian and Ukrainian partner will lead to the establishment of a common services protocol, allowing for a higher quality of the services provided. In addition, more than 40 health professionals are benefitting from different vocational training sessions to improve the quality and effectiveness of the protocol implementation. Almost 300 children are being screened in newly established counselling points and around 400 are receiving innovative rehabilitation therapy (hydrotherapy, neurofeedback, intensive and sensory therapies, among others). The parents of the children are also taking part in awareness raising and mentally equipping programmes.
