Young people with promising business ideas abound in the Mediterranean region. However, young entrepreneurs encounter severe credit constraints, and gathering enough money to start or scale up their enterprise is often impossible. Through microfinance packages, MEDSt@rts helps youth with innovative business ideas in digitization, sustainable tourism, handicraft, etc. Scouting, training and funding are the three main steps of the MEDSt@arts approach, and, as a result, new SMEs are being launched in each participating country leading to the creation of new jobs.
