The project aims to improve the care of the elderly providing more comfortable living conditions on both sides of the border, developing new and improved services both for the elderly and the disabled people. The objective is to reduce the social exclusion that this vulnerable sector of the population suffers. Elderly and disabled people will benefit from modern rehabilitation equipment and other tools, among which a new car, a lift and a modern kitchen. At the same time, nurses, social workers and volunteers are being trained to improve their knowledge on social care services.
