The history of wine in the Black Sea area goes back at least 6,000 years: wine making is part of national legacy in the Republic of Moldova, Romania and Bulgaria. The WINET project unites over 100 wine producers and interested parties from the three countries in a professional network to increase trade and cooperation between them in the wine sector. The project upgrades a classic networking to a new level via modern on-line technologies: the new WINET platform works as a support tool for easier promotion of products and services, collaboration, and trade among members of the countries and beyond.
