The main purpose of the ECOTOUR-NET project is to diversify tourism activities in the Black Sea region by developing new initiatives based on the natural and cultural potential of the region. The project partners have created eighteen tourist trails, bringing together almost fifty different locations from five different areas. The products go from bicycle routes, hiking trails or bird watching towers, to recreation spots and local shops. The project partners have also created a web portal - in English and in the languages of the project partners - collecting all the necessary information regarding the trails and touristic spots. In addition, a mobile phone application, a travel guide and a promotional film will be developed to attract tourists beyond borders.
