

HAZARM

A cross-border network to manage natural hazards

PROJECT TITLE	HAZARM - Integrated Networks for Hazard Risk Management
IMPLEMENTATION PERIOD	08.06.2020 – 25.07.2022
ORGANISATIONS INVOLVED	“Gheorghe Asachi” Technical University of Iași (RO); Technical University of Moldova (MD); Institute of Geology and Seismology (MD)
PROGRAMME	Romania-Republic of Moldova ENI CBC 2014-2020
TOTAL BUDGET	294.133 €

Romania-Republic of Moldova
ENI-CROSS BORDER COOPERATION

The project seeks to bridge the gap between Romania and the Republic of Moldova in emergency action plans and strategic approaches to natural disasters, by creating a cross-border hazard management network at the EU Eastern Border. The project partners are using state-of-the-art technology to evaluate and map risk areas, they are preparing a guide of common practices, including prevention measures, monitoring techniques and intervention strategies to respond more effectively to the consequences of natural hazards. Field missions to both sides of the Prut river, learning to detect remotely the risk of floods or studying the recurrence of natural hazards are only some of the activities contributing to improving cooperation and awareness of natural disasters in the project area.
