

IBSSNORTH

*Surveillance systems
to fight illegal migration
and smuggling*

PROJECT TITLE **IBSSNorth: Improvement of Ukraine – Poland border surveillance system (Northern segment)**

IMPLEMENTATION PERIOD 06.11.2018 - 05.11.2021

ORGANISATIONS INVOLVED Administration of the State Border Guard Service of Ukraine (UA); Lutsk Border Guard Detachment of the State Border Guard Service of Ukraine (UA); Nadbużański Border Guard Regional Unit of the Republic of Poland (PL); Polish Border Guard Headquarters (PL)

PROGRAMME Poland-Belarus-Ukraine
ENI CBC 2014-2020

TOTAL BUDGET 2.451.877,20 €

**PL-BY-UA
2014-2020**

The IBSSNorth project aims to prevent illegal migration and smuggling at the Polish-Ukrainian border. Through the purchase of equipment of surveillance, the partners have improved monitoring of the common border and response to attempts of illegal crossings. Nadbużański Border Guard Regional Unit (PL) received 17 cooled thermal cameras, 22 portable radiotelephones and a thermographic camera for a drone; whereas Lutsk Border Guard Detachment (UA) was provided with 8 patrol vehicles, 3 thermographic complexes and 148 radio stations. The purchased equipment helps to detect new methods of smuggling, such as low-flying radar-evading small aircrafts crossing the border.

WELL-FUNCTIONING BORDER-CROSSING POINTS

Project co-funded by
the European Union
