A renovated bridge over the Toczna River in Łosice. Extra lanes, new traffic lights and pavements, road marking and signs, rainwater and sanitary installations between Stok Lacki and Mordy. These are the renovations made at the provincial road No.698 in the Polish border area which now offers a better connection of Mazowieckie Voivodeship with the neighbouring Volyn oblast in Ukraine. By improving the road system, the DW698 project facilitates relations – including business – between the neighbouring countries and provides conditions to local inhabitants to increase their social and economic engagement.
